

M2M Communication Linecard

SectorPlanar and OmniPlanar antennas for mobile and stationary radio systems from 70 to 5800 MHz. Customized antenna solutions.

Modules and Chips for driverless Wi-Fi and LAN connection.

i-LOTUS

Miniature GPS Receivers, GPS Timing Modules with RF Jamming Immunity

Modules for M2M Connectivity: Bluetooth, ZigBee, WLAN. Robust industrial radio solutions: 868MHz, 915MHz, 2.4GHz

Device Networking
Wireless Device Servers
Modules and Boxed Products
IT Management

MOTOROLA

M2M Modules for GSM, GPRS, EDGE, UMTS, HSPA, GPS, CDMA. Programmable Versions (C and Java).

ISM RF Transmitter / Receiver Transceiver for AMR / RFID from 300 up to 990 MHz Chip-Solution.

SiRFstarIV™ based Ultra small GPS Receivers GPS modules with integrated antenna

RF Components and Modules
Short Range Radios,
Standalone Radio Systems
433, 868, 915 MHz ISM Band
Wireless HART, WLAN, Zigbee

TCP/IP Hardware Solutions
Serial to Ethernet Modules
RF to Serial Gateway (RS232)

PowerLine Communication
Y-Net Protocol Stacks
HomePlug Command&Control

RF & Microwave

Agilent Technologies

Broadband GaAs MMIC Amplifiers Low Noise, Broadband, Medium Power. Attenuators, Switches, Prescalers and Diodes.

Lowest noise hybrid VCO's, CRO's, synthesizers, PLL's

PIN & Schottky diodes. Silicon & GaAs MMICs, Bipolar Transistors, GaAs FETs, RF Mixers, LNA Modules

RF & Microwave Capacitors, filters, baluns, couplers & diplexers

Gain blocks, power amplifiers, attenuators, chip capacitors, PIN, Schottky & Varactor diodes, directional detectors, directional couplers, hybrids, RF Infrastructure building blocks, power dividers/combiners, phase shifters, receivers, switches, synthesizers/PLLs, Modulators/demodulators & WLAN front-end modules.
